A comparison between experimental, quantum and quasiclassical properties for the $N(^4S) + O_2(X^3\Sigma_g^-) \rightarrow NO(X^2\Pi) + O(^3P)$ reaction M. Gilibert, X. Giménez, M. González, R. Sayós and A. Aguilar	1
The nonlinear stretching model of hydrogen bonds and local self-fluctuation of base rotation in DNA C.-T. Zhang and K.-C. Chou	17
A study of the carbon-halogen bond breaking in tert-butyl halides by the PM3 quantum chemical method V.A. Tikhomirov, E.D. German and A.M. Kuznetsov	25
Theory of excitation energy transfer in the primary processes of photosynthesis. III. Mono-exponential regime J. Dvořák and L. Skála	31
Forward and reverse electronic energy transport and trapping in solution. I. Theory L. Kułak and C. Bojarski	43
Forward and reverse electronic energy transport and trapping in solution. II. Numerical results and Monte Carlo simulations L. Kułak and C. Bojarski	67
Diffusional description of vibrational relaxation in a binary mixture of diatomic molecules - quantum oscillators O.V. Skrebkov	87
A modification of the non-Markovian encounter theory. III. Hopping and diffusion mechanisms of reactions A.A. Kipriyanov, I.V. Gopich and A.B. Doktorov	101
Ab initio study of the LiH <sup>+</sup> molecule, electronic interaction analysis and LiH UV photoelectron spectrum H. Berriche and F.X. Gadea	119
A method for including environment polarization effects in ab initio cluster embedded calculations. Application to the water deprotonation over an ideal Al-MgO surface J.A. Mejías, J. Oviedo and J. Fernández Sanz	133
Density functional calculations of excitation energies and oscillator strengths for C1s $\rightarrow \pi^*$ and O1s $\rightarrow \pi^*$ excitations and ionization potentials in carbonyl containing molecules M. Stener, A. Lisini and P. Decleva	141
The lowest-lying Rydberg states of Si <sub>2</sub> : an ab initio study F.L. Sefyani and J. Schamps	155

## Contents

(continued from page 4 of cover)

The energetics of fragmentation of the naphthalene cation G. Granucci, Y. Ellinger and P. Boissel	165
Pressure-induced phase transitions in 9,10-anthracene derivatives: anthraquinone A. Brillante, R.G. Della Valle, R. Farina and E. Venuti	177
Spin-lattice relaxation in Mössbauer spectra of metmyoglobin: investigation of crystals, water and water-glycerol solutions A.R. Bizzarri, O.A. Iakovleva and F. Parak	185
Molecular dynamics study of water adopting a potential function with explicit atomic dipole moments and anisotropic polarizabilities P.-O. Åstrand, P. Linse and G. Karlström	195
Theoretical study of interactions among surface defects by He scattering technique: the reason for the failure of the cross section geometric overlap hypothesis G. Petrella and L. Cassidei	203
Accurate inelastic scattering factors for lithium to argon calculated from MR-SDCI wavefunctions H. Meyer, T. Müller and A. Schweig	213
Potential energy surface effects on differential cross sections for polyatomic reactions G. Nyman, D.C. Clary and R.D. Levine	223
Adiabatically corrected quasiclassical model for the vibrational predissociation of van der Waals complexes Y. Karni and E.E. Nikitin	235
Wave packet calculations on ion-molecule reactions N. Marković and G.D. Billing	247
Determination of the vibrationless level of Sn states of chlorobenzene by double resonance multiphoton ionization photoelectron spectroscopy. Evidence of IVR within these states P. Asselin, F. Piuzzi, M. Mons and I. Dimicoli	261
Photochemistry in jet-cooled aniline derivatives C. Dedonder-Lardeux, C. Jovet, S. Martrenchard, D. Solgadi, J. McCombie, B.D. Howells, T.F. Palmer, A. Subaric-Leitis, C. Monte, W. Rettig and P. Zimmermann	271
Experimental and ab initio study of the molybdenum K and L edges excitation in $\text{Mo}(\text{CO})_6$ and $\text{MoF}_6$ F. Guillot, C. Dézarnaud-Dandine, M. Tronc, A. Lisini, P. Decleva and G. Fronzoni	289
Picosecond transient spectral hole-burning studies on oxazine 750 in a silicate xerogel P. Weidner and A. Penzkofer	303
Charge transport in molecularly doped polymers at low dopant concentrations: simulation and experiment B. Hartenstein, H. Bässler, S. Heun, P. Borsenberger, M. Van der Auweraer and F.C. De Schryver	321
